SPANISH FORCES STILL FIGHTING RIFF TRIBESMEN

(Special from United Press)

Gibraltar, Nov. 26.—Spanish despatches from Melilla to-day admit that the peace negotiations between the Spanish force under General Marinan and the rebellious tribesmen have collapsed utterly and that hostilities are again under way. The despatches say that following the failure of the negotiations, General Marinan ordered a general advance which is being made to-day from the fortifications about Melilla. Heavy fighting is imminent.

For weeks reports have come from Melilla to the effect that the fighting was at an end and that the natives had accepted terms of surrender imposed by General Marinan. It is believed here that the story of peace overtures by the Moroccan forces was either made of whole cloth by the Spanish authorities for the purpose of satisfying public opinion or that General Marinan was fooled by the natives who advanced the false peace terms for the purpose of gaining time. The Melilla despatches say that General Marinan has divided his advancing force which consists of 160,000 men into five columns. The movement is directed against the towns of Sador and Selouan, with the ultimate object of gaining control of the entire Keri valley. If the advance is successful the valley will be strongly fortified to resist the incessant guerrilla warfare of the Riffs. The natives have as yet made no strong resistance to the Spanish advance but it is believed that a strong force is being concealed along the line of advance and a clash is momentarily expected. Marinan has taken the most elaborate precautions to guard against an ambush surprise as every Spanish setback in Morocco has resulted from such an attack. A frightful condition of the Moroccan roads and the presence of numerous barricades erected by natives to hinder their opponents hamper the Spanish movements and hinder concerted action by the various columns.

Mrs. Louise Hite, 428 Outen St., Danville, Ill., writes, October 1st: "Foley's Kidney Pills started me on the road to health. I was treated by four doctors and took kidney remedies. My kidneys grew worse, and the doctor told me I only could live from two to six months. I have been better since I took all my own work, and I shall be very glad to tell any one afflicted with kidney or bladder trouble, the good results of Foley's Kidney Pills." Commence to-day and be well. Do not risk having Bright's Disease or Diabetes. F. B. Brill and Curtis Pharmacy, local agents.

TRANSFUSION FROM SON SAVING FATHER

Hartford, Nov. 26.—Unless the properties of the attending physician at the St. Francis Hospital, Hartford, Timothy McCarthy, of Farmington, and his powerful son, Eugene, who once played tackle on his football team at Harvard, were not an all around strong man in the gymnasium, will eventually have occasion for a grateful remembrance of the blood transfusion operation which was followed by another transfusion, resulting in the removal and treatment of the kidneys.

Extending his left arm to the surgeon, Eugene allowed the physician to tap the artery in his wrist, which was then sewed to the main vein in his father's left arm, just above the elbow. For months the elder McCarthy has been losing blood, until five sixths of his supply had been wasted and physicians announced that only the removal operation would save him. His son volunteered for the operation, and the physicians say he can go home by Sunday. The father is much better, though still in a precarious condition.

The son's blood was allowed to flow into the veins of the father, forty minutes. During that time it is estimated a third of the blood of the son passed into the father. When the operation was started the father had absolutely no color, resembling a piece of marble, but within five minutes after the son's blood began to flow into the father's veins, color came back, and the operation noticed his face commenced to flush, and by the time the flow was stopped the face had completely returned to normal.

The second operation performed only once before in this country, consisted of removing both kidneys and administering counter-irritant to allay the malady.

TELEAUTOGRAPH AT EVERY TELEPHONE

New York, Nov. 26.—A revolutionary change in the telegraph service is being effected by the new merger of telephone and telegraph interests.

The merger, resulting in the new company, will be the elimination of the telegraph office with the dispatch, it is to be eliminated. According to these plans, it will soon be possible for the telephone subscriber to write out his dispatch on an electric machine, which will reproduce it in a telegraph form in the telegraph company. This will virtually make a telegraph office out of every telephone station and will enormously increase the facilities of the telegraph companies.

While it will take some months for the telephone company to work out the arrangement, the new company has already said that it would be only a short time before such a device would be placed at the command of all the business houses of the United States.

In the opinion of those who have studied the situation thoroughly, this improvement will be the most important made in the telegraph service of the United States for the last fifty years. While all the arrangements have not yet been completed, it is believed that such an instrument can be supplied to large subscribers at virtually no extra expense, while it will be well worth the cost for the person who has it at a relatively low cost.

The charge for such a writing machine with a direct telegraph connection will probably be in any case exceed one hundred dollars.

One very important development which is expected to follow the working out of the alliance between the telephone company and the telegraph company is the ultimate reduction in the expense of sending a telegraph message.

One of the highest officers of the telephone company said that he believed it would be possible for the telegraph company to accept messages on the basis of a 25-cent charge for a 15-word message, instead of a 10-word message.

Russia's copper production is increasing rapidly, amounting to 10,394,164 and 15,991 tons in the past three years respectively.

A Texas woman has patented a chair the back and seat of which are hinged to a board in front, below the seat in such a manner that the whole affair may be converted into an ironing table.

Fairfield County News.

Damages By Hunters.

Game wardens have received complaints from owners of land in Sandy Hook, Newtown and surrounding territory that rabbit hunters are working destruction to stone walls and fences. In many instances stone walls have been torn down for several feet and left in that condition. This can mean but one thing according to the officials, and that is that sooner or later all the hunting grounds will be posted.

Horse Meat Sold.

That horse meat is sold for beef as well as "holy" calves by butchers who conduct slaughter houses on Capboard Ridge, Danbury, is the charge which some of the Danbury butchers are making. They have made their complaint to H. O. Averill, the state cattle commissioner. Danbury butchers who claim to be familiar with conditions at the Ridge alleged that the place is being made a clearing house for diseased and aged cattle that have been condemned in New York. The cattle commissioner is expected in Danbury shortly to investigate.

When The Stomach Stops

Working Properly, Because There Is Wind In It. Use Stuart's Dyspepsia Tablets to Set It Going Again. A Trial Box Free

THE DOCTORS call it flatulency, but unprofessional folks know it as "wind on the stomach," and a most distressing state of things it is. It is a serious condition of this great motor organ. Always annoying and painful in the extreme, at times often leading to bad and fatal results. The stomach, embarrassed and hampered with wind, cannot take care of its food properly and indigestion follows, and this has a train too appalling to contemplate. This entire system is implicated—made an active or passive factor in this trouble and life soon becomes a questionable boon.

ALL THIS IS EXPLAINED in doctor books; how undigested food causes gases by fermentation and fermentation, in which process some essential fluids are destroyed—burnt up—wasted by chemical action, followed by defective nutrition and the distribution through the alimentary tract. It is a vicious circle, and as a consequence the stomach and entire system is starved. Plenty of food, you see, is spoilt in preparation and worse than worthless.

A DERANGED STOMACH is the epitome of evil; nothing too bad to emanate from it, but the gas it generates is probably its worst primary effect and the only way to do away with this is to remove the cause. STUART'S DYSPEPSIA TABLETS go to the root of this trouble. They attack the gas making foods and render them harmless. Flatulency or wind on the stomach simply cannot exist where these powerful and wonderworking little tablets are in evidence.

THEY WERE MADE for this very purpose to attack food making foods and convert them into proper nutriment. This is their province and office. A whole book could be written about them and then not all told that might be told with profit to sufferers from this painful disease, dyspepsia. It would mention the years of patient and expensive experiment in effort to arrive at this result—of failures innumerable and at last success. It would make mention of the different stomach correctives that enter into the tablet and make it faithfully represent all.

STUART'S DYSPEPSIA TABLETS are not alone intended for the sick, but well folks as well; for the person who craves hearty foods and wants to eat heartily and run no risk of bad effects, they act like a charm and make eating and drinking a delight and pleasure. They keep the stomach active and energetic and able and willing to do extra work without special labor or effort. Don't forget this! Well people are often neglected but the STUART DYSPEPSIA TABLETS have them in mind.

A FREE TRIAL PACKAGE will be sent any one who wants to know just what they are, how they look and taste, before beginning treatment with them. After this go to the drug store for them; everywhere, here or at home, they are 20 cents a box and by setting them at home you will save time and postage. Your doctor will prescribe them; they say there are 40,000 doctors using them, but when you know what is the matter of yourself, why go to the expense of a prescription? For free trial package address F. A. Stuart Co., 150 Stuart Building, Marshall, Michigan.

P. S. Better send today for samples of the tablet. You will get quite a box of them.

MOCHA and JAVA COFFEE 25c

Anyone who has ever drank our NATIONAL BLEND will tell you that it is the BEST they have used. It has that full, rich flavor that is so satisfying.

TEAS, 25c and 35c

While we are talking about something good to drink, let us say a word about TEAS. To some people a meal without a good cup of Tea would be no meal at all. Now we handle all the favorite kinds such as Oolong, Ceylon, English Breakfast, Japan, etc. at the above prices.
